Adding Accessibility to Your Entire Home

It's knowing you can get up and down stairs on your own. It's regaining your independence. It's feeling secure each and every time you ride your stair lift—knowing you don't have to worry about power outages, or parking it precisely at a specific spot on the track. It's knowing you've made the best decision and acquired the right stair lift for you. It's the feeling you get when you own a Symmetry Triumph™ stair lift.

This energy efficient stair lift is simple to operate, durable and lightweight. Surprisingly compact when folded, the Triumph™ boasts a unique patented drive system, wireless remote and intuitive operating controls with indicator lights.

Installations do not require any modifications to the homes interior.

Advantages

- Information at a glance: Easy operating controls & indicator lights
- Responsive Controls: A rocker control with constant-pressure feature stops the lift the instant the control is released
- Safety & Security: Removable key lock for safety when you are away* *optional upgrade
- Unique Drive System: This patented drive system requires less energy than a 25 watt lightbulb and can make more than 2 times the amount of trips on battery power than other leading units
- Seat upholstery color option: Light Almond, Alpine, Ruby, Bluebell

Specifications

- Lifting Capacity: 350 #
- Drive: Patented Worm Drive
- Power Source: 24 VDC
- Folded Width: 11"
- Seat Size: 19" w x 16" d x 18" h
- Track Length: 16" Standard; Maximum 75"
- Range of inclination: 27" x 52"
- Warranty: 3 Year on Components/Drive Train
  Lifetime on gear rack
  1 Year on batteries

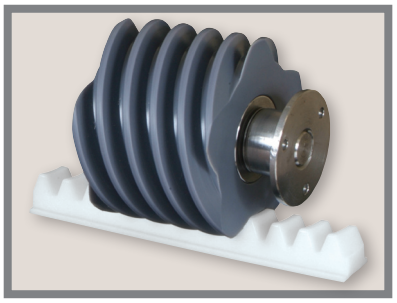
Folding Rail Option

This patent-pending automatic-fold design is the first of its kind, the Triumph Folding Rail means the stair lift won't interfere with doors or traffic ways at the bottom of the stairs, offering a solution to people who would otherwise not be able to consider a stair lift.

The Folding Rail does not have motors, cylinders, wiring, or control features to fold the track. It is completely mechanical. This decreases the cost, complexity and power usage for the Triumph Folding Rail accessibility solution.

This brochure is intended for informational purposes only and should not be used for construction. Please contact the local representative for a job specific drawing.

Safety sensors on carriage and footrest stop the lift instantly if an obstacle is encountered.



This unique Drive System requires no greases or lubricants and is extremely energy efficient.
