Symmetry Elevating Solutions Elevator Car Panel Options

Standard & Custom Panels

Flat Panel

Our standard and most affordable option, the flat panel style offers smooth flat-veneer interior walls with matching ceiling panels and wood car sill in three standard or six custom wood species.

Shaker Panel

With a custom 4-inch-wide raised band of matching flat panel trim to frame the exterior of the cab wall and form symmetrical quadrants for a clean, manicured elevator car interior look.

Recessed Panel

The design for this elevator car panel is subtle, clean, and makes for a very simply stated yet beautiful car panel. The beveled edge molding creates a recessed panel look and feel.

Raised Panel

Luxury, beauty, versatility. Our raised panel car offers a two-dimensional beveled edge with a router tongue-and-groove frame. Framed-in with raised molding, this is our most elegant car wall.
